

5G AND FIXED WIRELESS ACCESS

Bring ultra-fast wireless connectivity wherever and whenever you need it

Reliable wireless, anywhere you work

Work is no longer relegated solely to the office, so your network shouldn't be either. Empower your users and extend high-speed wireless to even the most remote corners of the globe with Momentum. Enable conference calling with HD audio and video on a network that's faster and more secure than Wi-Fi.

Use 5G as a primary connection for remote or temporary sites, or as a backup to keep critical locations online. Spin up new locations on demand, add redundancy to your network, and support IoT and edge devices, all managed by Momentum.

HIGHLIGHTS

Bring ultra-fast wireless connectivity wherever and whenever you need it

Connect from virtually anywhere in the world with LEO satellite internet

Choose either static or dynamic IPs

Pooled and unlimited bandwidth plans with no throttling or overage fees

Up to ten times faster than 4G LTE

5G AND FIXED WIRELESS ACCESS

Experience true wireless freedom

Bring the power of 5G wherever you go

Whether at home, in the office, or on the road, stay connected even in extreme conditions with satellite technology designed to endure the elements, and pay a flat monthly rate to use as much bandwidth as you need.

Connect anytime, anywhere you need

All you need to do is plug your router in and point it up. As long as it has an unobstructed view of the sky, you'll have access to lightning-fast 5G internet in minutes.

Hassle-free, transparent pricing

With Momentum, there are no hidden costs or overage fees. We give you true unlimited bandwidth and connectivity for a single price. No headaches, no contracts, and no surprises.

Faster and more secure than Wi-Fi

Enable conference calling with HD audio and video, keep everyone in touch wherever they go, and unlock new lines of business with IoT and edge devices.
