

Connect directly to Microsoft Azure with fast, private connectivity

Enjoy private direct connectivity

Most vendors access Microsoft's Azure backbone through the public internet, but Momentum isn't like most vendors. Working with us means you have a direct connection to Microsoft's infrastructure, guaranteeing fast, reliable, and private connectivity whether you're connecting data centers or on-premises infrastructure.

As an Azure ExpressRoute Partner, Momentum gives you the speed and reduced latency of Azure alongside our own carrier-grade global network, all backed by 24/7 high-touch support.

HIGHLIGHTS

Direct access to Microsoft's backbone

Supports up to 100 Gbps bandwidth

MACsec physical link encryption

Private cloud connections with support for direct WAN connection

Consistent latency with increased reliability and speed

24/7 high-touch support from Momentum's cloud networking experts

Get a faster, private path to Microsoft Azure

AZURE EXPRESSROUTE

We'll make your cloud connections fast, reliable, and private

Multiple connectivity options

Extend your network into the Microsoft cloud with Azure ExpressRoute, or connect directly to Microsoft's network with ExpressRoute Direct. Momentum can also link multiple circuits and connect any two networks.

Support hybrid app development

Build applications that span on-premises infrastructure and Azure by relying on ExpressRoute's reliable, predictable, and high-throughput connections.

Effortless scalability

High throughput and low latency let you enjoy the economics and scale of the public cloud without compromising performance, with all traffic optimized via Microsoft's BGP dynamic routing.

Storage, backup, and recovery

With bandwidth up to 100 Gbps, ExpressRoute is a highly efficient, cost-effective option for everything from periodic data migration and replication to disaster recovery.

Enhanced deployments

With over 200 points of presence, Momentum's carrier-grade global network complements ExpressRoute with additional visibility, security, and control.

Full stack services

Combine Azure ExpressRoute with a full portfolio of complementary solutions, including SD-WAN, managed networking, and security, so you can optimize your network end to end.

Why Momentum?

750+CARRIERS AND
SERVICE PROVIDERS**36K**ENTERPRISE
