

Add high-performance connectivity to remote and hard-to-reach locations

Deliver reliable internet anywhere your business operates

Fast, low-latency satellite internet, fully managed by Momentum. Remote, temporary, and underserved locations often struggle with slow, unreliable, or unavailable connectivity because traditional carriers take too long to deploy or can't reach them at all. LEO satellite delivers fast, low-latency internet where fiber and fixed wireless aren't available.

Momentum makes LEO satellite internet work as part of your network, handling installation, configuring it for primary or failover use, and integrating it into your existing network and SD-WAN. You get reliable connectivity, managed end-to-end by a single provider and support team.

HIGHLIGHTS

Coverage across Canada and the USA where other carriers can't reach

Flexible bandwidth plans with optional top-ups to fit every site

Primary connectivity for remote sites or reliable failover for resilience

Seamless integration into your core network or SD-WAN

Fast, low-latency satellite internet designed for business use

Fully managed by Momentum: installation, configuration, monitoring, and support

Extend reliable connectivity to every site

LOW EARTH ORBIT SATELLITE INTERNET

What's included with Momentum's LEO satellite solution

High-performance satellite connectivity

Fast, low-latency internet designed for business use, delivering consistent performance to remote and hard-to-reach locations.

Professional installation and mounting

Momentum installs and mounts your LEO satellite kit using a single cord for power and connectivity, enabling faster, cleaner, and more reliable deployments.

Get coverage where other carriers can't reach

Works across Canada and the USA without relying on local fiber or fixed wireless infrastructure, making it ideal for remote sites.

Seamless network and SD-WAN integration

Configured in pass-through mode and integrated directly into your core network or SD-WAN for consistent primary or failover connectivity.

Choose from flexible bandwidth plans

Select the ideal data tier with clear usage caps and optional top-ups to support each of your sites.

Fully managed service and support

Momentum manages provisioning, monitoring, bandwidth alerts, troubleshooting, and ongoing support as your single connectivity partner.

Why Momentum?

750+CARRIERS AND
SERVICE PROVIDERS**36K**ENTERPRISE
