

MANAGED NETWORK

Remove the complexity from network management

Enjoy all the benefits of an enterprise network with none of the hassle

Trusted by over 30,000 locations worldwide, Momentum has delivered diverse connectivity solutions to enterprise clients for over twenty years. Our carrier-neutral cloud is interconnected with over 750 carriers and service providers, including undersea fiber and customized low-latency paths.

We customize every solution to fit your needs, environment, and budget. Every implementation is completed by highly trained engineers, with a dedicated project manager guiding you from design to day-to-day support. All you have to do is connect.

HIGHLIGHTS

Reliable, high-performance networking for every site and user

End-to-end management and expert support from day one

Scale faster with on-demand bandwidth as your business grows

Diverse, custom-tailored connectivity options from 750+ carriers

Wavelengths up to 400GE for added resiliency and capacity

24x7x365 monitoring and alerting on every circuit

Let Momentum handle your network

MANAGED NETWORK

Deploy a managed network that fits your connectivity needs

Deploy diverse connectivity options

Choose between dark fiber, point-to-point, VPLS, EVPN-VXLAN, dedicated ethernet, metro ethernet, high-capacity broadband, wave, and more, all on a carrier-neutral network built for performance and reliability.

Future-proof your network with wavelengths

Support bandwidth-intensive applications with connections up to 400GE, diverse fiber routes, diverse end locations, and on-demand scaling to meet your evolving needs.

Ensure peace of mind with 24/7 uptime notifications

Network interface devices monitor the connection status of every circuit we deliver, so degradation is caught and escalated before your users notice.

Optimize routing worldwide

Traffic is routed through 200 points of presence across more than 60 countries. Where we don't already have a presence, we deploy our own circuits to bring service to you.

Why Momentum?

750+CARRIERS AND
